MEDICS ADMINISTER IV ON EMS MANIKIN

- What is It?** Vital Sim, Vital Signs Simulator, acquired in 2009.
- Purpose:** In the Love County EMS Training Department, ambulance EMTs, Paramedics, and students learn from practicing on the lifelike manikin. In this illustration, medics are setting up the flow of intravenous fluids.
- Find a Vein:** The medic injects an IV needle into the manikin's lifelike skin (above left).
- Blood Flash:** A test tube of simulated blood (upper right) supplies a "blood flash" to the injection site if the medic successfully found a vein.
- IV Fluids:** With a successful injection, medics can administer glucose or IV medicines (lower right) to a patient on the way to the hospital.
