Patient Support Chair

Registered nurse Jan Marutzky points out the multiple tilt-only and tilt-and-recline adjustments to customize the seating for individual patients.

After seeing one in use at a nursing home, Chief of Staff Dr. Stephen Hutchins (left) recommended Broda chairs to help patients with lower back pain.

What Is It?

Broda 85C Elite Tilt Chairs

Year Acquired: 2014

Use:

The tilt chair provides a level of support and comfort that enables hospital and skilled nursing patients to spend time out of bed. Made of tubular steel, it can double as the patient's shower chair.

How it Works:

In a reclined position, the Broda chair takes gravity off the lumbar area of the spine. This gives relief to patients who have lower back pain. The straps across the seating redistribute pressure, helping to prevent skin breakdown that causes bedsores.
